

The Ignition System

If you are an automotive instructor or student looking for a complete course on the ignition system then look no further. AVI and Jim Linder "The Injector Guru" have got you covered with this course on basic ignition systems and diagnostic procedures.

The program gives automotive students an overview of the components and purpose of the ignition system and distributor. It also covers the distributor cap and rotor, plug wires and spark plugs. This is the next best thing to having a guest instructor like Jim Linder in your classroom teaching first-hand.

- * EI (electronic ignition) and DI (direct ignition) types of systems
- * Components in a DIS system
- * Coil packs-CKP, CPS and more

More Information

AP-5

Runtime: 45 Minutes
Manual and Post Test
Included.
