

MACS A/C Quick Hits

Help your customers keep their cool with the latest in A/C service with Paul DiGueseppe from MACS. Since A/C systems are constantly being updated with new technology and service procedures, he goes in-depth to show you the latest techniques so you can quickly diagnose A/C repairs.

Paul gives you helpful tools for electrical diagnostics and tricks to manipulate the solenoid and it's circuitry. He covers more than 8 different case studies and hands-on training with

- *the micron gauge
- *leak detectors
- *multimeters
- *amp clamp testing
- *Ross-Tech software demonstrations
- *circuit testing with the Hickok tool
- *and much more!

He also shows you how to properly maintain your tools so you get the most accurate readings for your A/C service.
