

Enhanced Ford Scanner Diagnostics

If scan tool diagnostics on Ford vehicles has been giving you a headache here is your cure. Bill Fulton and AVI are here to help with tough Ford OBD-II problems you may have. This program covers diagnostics on the full range of Ford systems.

Bill helps you understand freeze frame parameters, false air leaks in MAF systems and their effects, excessive EGR conditions and enhanced Ford packets. He covers continuous, fuel, comprehensive and trip monitors and shows you how to use long and short term fuel trim. This program explains continuous DTC problems with Mode 6 testing, how to test and use output controls, engine load parameters and shows you what to do when the scan tool reads "NO DATA."

Bill also covers spark advance, misfire status and provides tips on Ford coil-on-plug. This class will give you the knowledge you need to take on any tough Ford diagnostic issue that rolls into your shop.
